

HERON SHORES HOMEOWNERS, INC
GARAGE DOOR SCREEN SPECIFICATIONS

The following specifications apply to the installation of a remote controlled sliding two-panel telescoping screen to the bottom of the garage door:

INSTALLATION	To Interior of Door
WIDTH	16 Feet which is width of door
HEIGHT	20 inches per sliding panel
FRAME	1 ¾ inch white double sided aluminum around each panel with a 1 ¾ inch steel and aluminum faced sliding center support
SCREEN	Black fiber synthetic screening
SEAL	16 foot rubberized seal 1 ¼ inches wide attached to bottom of bottom panel
OPERATION	Automatically controlled with garage door opener to desired height
IMPORTANT NOTE	To conform to previously approved specifications, owners installing screens must paint the frame “garage door” gray and limit use (exterior exposure) to one 20 inch panel only. One panel screens are no longer available from any supplier
