

THINGS WE CHECK:

1. Irrigation timer
2. Rain sensor
3. Overspray
4. Leaks, broken parts
5. Micro-irrigation opportunities

ASK YOURSELF:

- Are you looking for ways to reduce your water bill?
- Do you have an automatic lawn sprinkler system?
- Do you want to eliminate water waste and improve your lawn and landscape?

BENEFITS:

- Free consultation
- Reduced lower water bill
- Conservation of resources
- Reduced environmental impact
- Reduced maintenance
- Improved health of your landscape

Did you know that an estimated 50% of your water bill is for irrigation?

Are you looking for ways to reduce your bill?

We can help you understand how your irrigation system works and eliminate wasteful practices.

The University of Florida's Institute of Food and Agricultural Sciences (UF/IFAS) Extension delivers research-based, unbiased information on a county-by-county basis that encourages landscape design, installation and management practices that minimize negative environmental impacts and conserve natural resources.

The **Florida Friendly Landscaping™ Program** provides educational assistance and advice to assist Florida residents in the design and maintenance of landscapes that help reduce the pollutant load in stormwater runoff and improve quality of life.

This public education and outreach program is available through the UF/IFAS Sarasota County Extension.

Extension programs are open to all persons without regard to race, color, sex, age, disability, religion or national origin. All Extension Service events comply with the Americans with Disabilities Act. Individuals with disabilities requiring special accommodations, please inform the contact person for each event at least 72 hours prior to the event date.
